

AirGorilla's PCO/UV N-Duct™

Photocatalytic Oxidation (PCO) Filter

153 square inches of nano-technology titanium dioxide mesh produces maximum destruction of airborne contaminants with negligible air resistance. Never needs cleaning or replacing.

Ease of Installation

Cut just one hole - 5" x 9" and install in the supply or return duct.

Two, 36 watt, Dual-Radiant Lamps

Provides over 5 times the killing power of the typical, single 12" UV lamp.

Operational LEDs

Advanced electronics that lets you know Power is On, UV lamp is on and working, and most importantly, when the UV lamp needs to be replaced (along with an audible reminder).

Lamp Replacement is a Snap

Don't have to unscrew or unfasten unit to replace lamps - simply open the cover and pull out old lamps - insert new ones.
